FUND OVERVIEW

The Fund seeks to track the performance of an index which offers indirect exposure to commodities through the use of a total return swap.

KEY BENEFITS

- Indirect exposure to a portfolio of different commodity contracts from seven different sectors:** Indirect exposure to a portfolio of different commodity contracts from seven different sectors
- Low-cost access to a broad array of commodities through a single total return swap:** Use to gain potential diversification benefits alongside a traditional allocation of equities and bonds
- Low-cost access to a broad array of commodities through a single total return swap

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The prices of commodities tend to experience greater variations than other asset classes (e.g. equities or fixed income securities). Investments in commodities are therefore potentially riskier than other types of investments.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
- The Fund's ability to track the benchmark's performance is reliant on the counterparties to continuously deliver the performance of the benchmark in line with the swap agreements (i.e. counterparty risk) and would also be affected by any spread between the pricing of the swaps and the pricing of the benchmark. If any swap counterparty fails to provide sufficient assets as security for amounts owed to the Fund, there might be an increased counterparty risk exposure at a given time.

iShares plc, iShares II plc, iShares III plc, iShares IV plc, iShares V plc, iShares VI plc and iShares VII plc (together 'the Companies') are open-ended investment companies with variable capital having segregated liability between their funds organised under the laws of Ireland and authorised by the Central Bank of Ireland.

Further information about the Fund and the Share Class, such as details of the key underlying investments of the Share Class and share prices, is available on the iShares website at www.ishares.com or by calling +44 (0)845 357 7000 or from your broker or financial adviser. The indicative intra-day net asset value of the Share Class is available at <http://deutsche-boerse.com> and/or <http://www.reuters.com>. A UCITS ETF's units / shares that have been acquired on the secondary market cannot usually be sold directly back to the UCITS ETF itself. Investors who are not Authorised Participants must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees and additional taxes in doing so. In addition, as the market price at which the Shares are traded on the secondary market may differ from the Net Asset Value per Share, investors may pay more than the then current Net Asset Value per Share when buying shares and may receive less than the current Net Asset Value per Share when selling them.
